

APPENDIX A Source Interlink Career Opportunity Form

POSTING DATE: 11/11/09

POSITION: Business Intelligence Analyst

DEPARTMENT: IT

LOCATION: Bonita Springs, FL

REPORTS TO: Sr. Dir, IT Svcs

FUNCTIONS:

Business intelligence (BI) analysts use analysis tools to query data repositories and generate reports. These reports help managers make business decisions by identifying trends and patterns in a company's stored operational data. The data to be analyzed may be varied: inventory, sales, customers and the like. It is usually stored in companywide repositories called data warehouses or in smaller departmental databases. A BI analyst may design daily reports, such as those that sales managers use to track demand for specific products in different geographic regions. The BI analyst also helps managers generate one-time, ad hoc reports by crafting a custom query against the data repository.

REQUIRED QUALIFICATIONS:

- Bachelors Degree
- Deep understanding of a company's business goals and operations.
- Experience with database and data analysis technology, as well as with enterprise applications and project management.
- Experience with Business Object suite from SAP, dashboard design, MS-SQL, and Oracle SQL.
- Good BI analysts are very methodical so that they can devise strategies for making sense out of mounds of data.
- They must also have good communication skills, be logical thinkers and work well in teams.
- The ability to sit or stand for prolonged periods of time
- Concentrated mental and visual demands, working with computer screen.

HOW TO APPLY FOR THIS POSITION:
